AI-Driven Product Designer with 4 years of experience turning complex ideas into simple, user-friendly experiences. I have worked on products across entertainment, sports, education, social media, logistics, real estate, marketplaces and healthcare industries. I combine research, product thinking, design systems, and strategy to create solutions that are not only intuitive for users but also aligned with business goals. What drives me is the challenge of taking on ambiguity, understanding people, and designing products that make their everyday life experiences better.
